WHY ATTEND COLLEGE IN NORTH DAKOTA?

North Dakota has a college that’s just right for you! North Dakota University System colleges and universities offer many areas of study, from one-year technical and vocational programs to professional degrees in law, medicine and pharmacy. NDUS colleges and universities will help prepare you to meet your career goals.

The NDUS Offers You…
— More than 700 programs to choose from
— A college near your hometown or one that’s miles away
— Room to grow and opportunities to spread your wings
— Individualized attention from your professors
— Cutting-edge technology at your fingertips
— Sports, student government, music and more than 750 clubs and student organizations

The NDUS Provides Access to Education
NDUS colleges and universities provide access to education anywhere in the world by offering distance learning in many forms, including:
— Internet
— Interactive TV
— Satellite
— Correspondence

For more information about each type of distance learning opportunity, go to any of the 11 campus websites. For more information about anytime, anywhere access to more than 1,000 Internet courses offered through the North Dakota University System Online (NDUSO), go to ndus.edu and explore “Take Courses/Earn Degrees Online” in the Student section of the website.

Choices, Choices, Choices!
What if you’re not sure what type of education best fits your strengths and interests? Your high school counselor will help you evaluate your options and make a smooth transition to college.
CHOOSING THE RIGHT COLLEGE FOR YOU

The North Dakota University System includes two-year colleges and four-year universities. While each campus is unique in size and the types of programs it offers, the bullet points below describe North Dakota’s public colleges and universities in general terms.

Two-Year Colleges …
— Offer technical and vocational programs that prepare you for a specific career; when you complete a technical or vocational program, you will receive a certificate or an associate in applied science (AAS) degree, either of which will enable you to directly enter the workforce in your particular field of study. Some programs take less than two years to complete.
— Offer associate in arts (AA) degrees and associate in science (AS) degrees; either degree may meet your educational goals or prepare you to transfer to a four-year university.
— Have open enrollment policies; they accept all high school graduates and general educational development (GED) recipients, but require students to take the ACT Assessment.

Four-Year Universities …
— Offer a broad range of programs and degrees, including four-year or bachelor’s degrees; some also offer graduate degrees, such as master’s degrees and doctorates.
— May offer a limited number of vocational and technical programs.
— Require students to meet admission requirements, including taking core high school courses and the ACT Assessment; some universities require a minimum ACT score. Some also accept SAT test results.

To learn more about North Dakota University System colleges and universities and the programs they offer, go to: www.ndus.edu. This website includes links to the websites of all 11 campuses.

WHAT ARE CORE COURSES?
Core courses are those required for admission to a four-year university in the North Dakota University System. The core courses are:

- **English**: Four courses
- **Mathematics**: Three courses (algebra 1 and above)
- **Laboratory science**: Three courses (including at least two in biology, chemistry, physics or physical science)
- **Social studies**: Three courses (not including consumer education, cooperative marketing, orientation to social science and marriage/family)

The North Dakota University System recommends that students take a mathematics course each year of high school, including advanced algebra. The University System also recommends that students take at least two foreign language courses, which may include American Sign Language or Native American languages. Additional courses may be required before you can be admitted to some college programs. Your school counselor can help you find out more about the specific requirements for the programs that interest you.

These requirements are not in effect at North Dakota University System two-year colleges. If you don’t take the core courses required to attend a four-year university, you can attend a two-year college. After successfully completing 24 college credits, you may be eligible to transfer to a four-year university.

GRADE-POINT AVERAGE — WHAT’S THE BIG DEAL?
A high grade-point average helps you gain admittance to the college or university of your choice. Plus, a good GPA may make you eligible for college scholarships. Your GPA will be one factor considered for acceptance at a college or university. Check with the campus of your choice for more information about admission standards.

EARN HIGH SCHOOL AND COLLEGE CREDIT AT THE SAME TIME!
As a high school sophomore, junior or senior, you may be able to take dual-credit and advanced placement (AP) courses. These courses meet high school graduation requirements, plus may help you get an early start on college classes. If your high school and an area college have an agreement to offer dual-credit courses, ask a high school administrator or counselor to help you determine if you’re academically ready for college. You may end up on the fast track for a college degree.

EARN A $6,000 COLLEGE SCHOLARSHIP
In 2009, the North Dakota Legislature created two great scholarships: the North Dakota Academic Scholarship and the North Dakota Career and Technical Education Scholarship.

Both programs reward North Dakota high school graduates who meet specific coursework, grade-point average and test score requirements. If you qualify, you may be eligible for up to $6,000 for undergraduate study at a four-year college or university or a community college in North Dakota.

Work with your high school counselor as you make plans for the remainder of your high school career; you’ll want to take the right steps to qualify for one of these new scholarships.

For more information, call the North Dakota Department of Public Instruction at 701.328.2755.
A high grade-point average helps you gain admittance to the college or university of your choice.
PLAN AHEAD — THE NORTH DAKOTA UNIVERSITY SYSTEM GIVES YOU MORE OPTIONS

It’s not too early to begin charting your career path. But what if you choose a college and a major, then begin college and change your mind? Many college courses transfer with you from one North Dakota University System college or university to another. In fact, systemwide agreements guarantee the transfer of all general education courses.

WHY TAKE THE ACT?

All students who plan to attend a public college or university in North Dakota are required to take the ACT assessment. As a North Dakota high school student, you will take the ACT during your junior year. North Dakota University System colleges and universities use ACT scores as a benchmark for determining eligibility for scholarships. For more information, contact your school counselor or visit the ACT website at: www.act.org.

The SAT test is another form of assessment used in some other states. SAT results also are accepted by NDUS colleges and universities.
